

Technical Data Sheet

Product Identification:

Dispersing Agent DA20

Product Description:

Dispersing Agent is a dispersant which will improve pigment dispersion in solvent base system and stability in liquid organic media.

Features and Benefit:

In the applications below the following benefits are achieved:

- Increased pigment wetting and tectorial properties.
- Improved performance of poor wetting resins.
- Produces highly pigmented concentrates making it ideal for mixing schemes.

Physical Characteristics:

- | | |
|--|-----------------|
| • Appearance : | Brownish Liquid |
| • Density (g/cm ³) : | 0.920 |
| • Gardner Colour : | 8 Max |
| • % solid content : | 95+/-1% |
| • Produces highly pigmented concentrates making it ideal for mixing schemes. | |

Applications:

- Flexographic Inks
- Gravure Inks
- The Dispersing Agent should be thoroughly blended with the mill base resin or solvent before the addition of pigments.

Recommended Storage & Handling:

- The available packing of Dispersing Agent is 20 Kgs Plastic Can & 200 Kgs MS drums.
- Keep all containers tightly sealed when not in use.
- Store in cool dry and dark place.
